- **Windows 8** support including touchscreen – **NEW!**

FEATURE	DESCRIPTION
Dual Protection, Full System Image Backup	Creates a complete copy of the entire disk, protecting against possible disasters, such as system crashes, hardware failures or accidental data deletion. Dual protection ensures that you are double protected by backing up your entire digital life locally and to the cloud. It is the only way to ensure your precious digital data is safe.
System Recovery	Restore your complete system efficiently and easily. Settings, configurations and all your files will be restored to your original state. With Acronis Cloud you can restore your PC image anytime anywhere to your existing PC or onto another PC.
Universal Restore	Whether you are at home, in the office or on the road, if your PC is lost, stolen or damaged you can restore your entire system on any PC, not just what you had before.
Intuitive User Experience	Full system image backup made easy with an intuitive and simple to use interface. Thoughtful design lets you navigate through all your scheduling, destinations and full backup needs.
Ultra Fast Upload	After the first full backup, Acronis True Image 2015 utilizes high-speed and efficient incremental and differential backups that ensure you always have the latest version of any changed file without having to perform an entire new backup.
Flexible File Recovery	Recover only files and folders you need, in case of any data loss, caused by accidental actions or corruption.
Scheduling	Know that your data, files and configurations are always up to date with automatic backups you can set up. Daily, weekly and monthly scheduling is available.
Personal Key Encryption	Protect your backups from unauthorized access with password and government-grade AES-256 encryption.
Versioning and Clean up	In addition to the latest system state Acronis True Image for PC always keeps versions of your backup allowing you to roll back to a previous state.
Rescue Media	Even if your PC has stopped booting you can boot it and recover from a backup with help of a rescue media builder. Just remember to create your media first.
