

Acronis® Small Office: Server Cloud Backup

Simple, Reliable Server Backup Software

for Small Offices and Home Offices

Backup files to Acronis® Cloud Storage

Automatically replicate your crucial files to Acronis® Cloud Storage to ensure your data is never lost and always available to you. Automatically, effortlessly, and securely. Secure, reliable, effortless server cloud backup.

Backup to external drives

Save a disk image containing your server's operating system, applications, and data to any USB drive or network-attached storage, and recover your entire system in minutes, rather than hours or days.

Restore to any hardware

Restore your server's disk image to any hardware. Thanks to Acronis® Universal Restore™ technology built into Acronis® Small Office: Server Cloud Backup, you can migrate to a new machine or recover to a different server with ease.

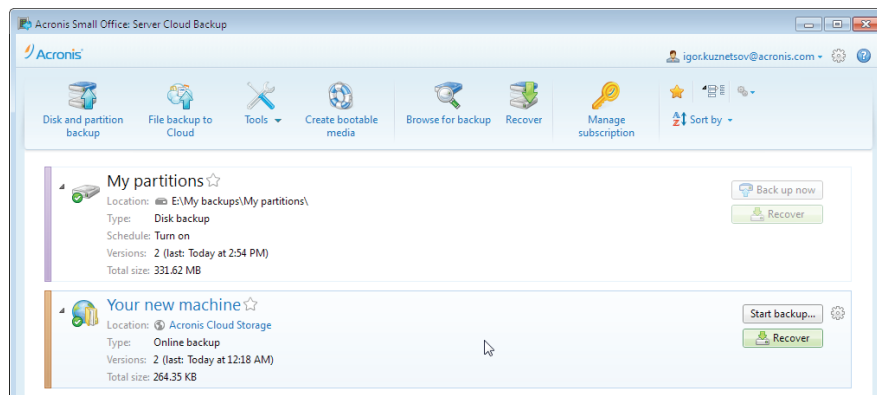

Fully automated, reliable and fast **Acronis Small Office: Server Cloud Backup** guarantees your business data protection 24/7.

Using the latest technologies, we've not only made the server backup process faster, more accurate, and secure – we've made it easy!

Join over 2 million people worldwide who trust Acronis to protect their business and personal data. Buy now starting from \$499 annually.

Free trial available for download from www.acronis.com/download-small-office-backup.

Top Features	
Secure, reliable Acronis Cloud Storage	Ensure you always have a copy of your files in a reliable and secure online data center
Fast and easy disaster recovery	Save image backups or snapshots of your entire system to USB drive or network full recovery to a bare-metal server or retrieval of individual files
Any hardware recovery	Recover your system image to a bare metal server or even dissimilar hardware in minutes
Incremental backup	Capture only the changes made since the previous backup to dramatically reduce backup time, network traffic, and backup file size
Individual file or folder extraction	Easily find and recover accidentally overwritten or deleted files from a disk image
Disaster recovery plan	Use an automatically generated document with step-by-step instructions explaining your recovery process.
Backup compression	Reduce backup file size and network traffic by 50% on average
Encryption	Ensure that your backups are protected and only you can recover your data using 256-bit AES encryption
