

Acronis® True Image™ Home 2012

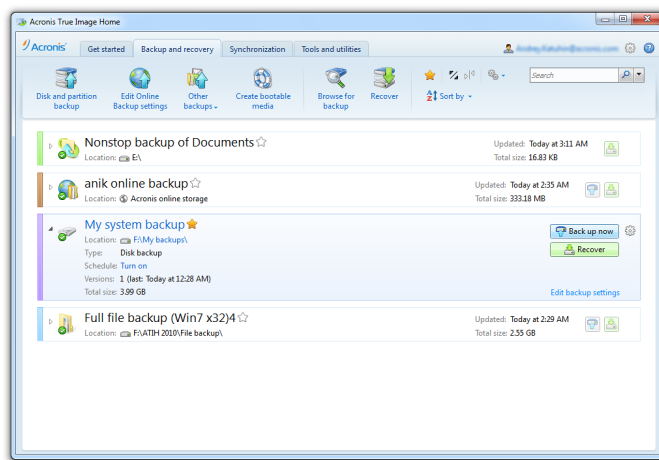

Backup, Protect, Recover
your PC Systems, Applications
and Files and Synchronize Your Files

Ever accidentally deleted a file, had a virus corrupt your files, or have a disk fail? These are just a few examples of how people lose pictures, music, personal and financial data. Don't let this happen to you. Now is the time to protect your PC with Acronis® True Image™ Home 2012.

Acronis True Image Home 2012 is based on Acronis' patented disk imaging and bare metal restore technologies and provides reliable backup and recovery of your PC systems, applications, settings and personal files. From an intuitive graphical interface, you can easily define where, locally or online, and how often to backup a PC.

Create copies of your hard drive with just a few quick steps while continuing to work. If you lose an important file, don't worry: you can go back in time to recover it rapidly. You can also easily synchronize files between folders, online data stores, multiple PCs or with friends and family over the internet with Acronis' file synchronization technology.

Acronis True Image Home 2012 GUI scales to the needs of novices and advanced users alike and is integrated into the Windows 7 control panel so you can backup Windows libraries with little effort.

Acronis® Nonstop Backup™ is designed to deliver continuous system and data protection, so you never lose valuable data. Advanced scheduling minimizes the time it takes to configure and automate backups and data protection. Try&Decide® creates a safe environment where you can browse the Web or try new software and then keep or discard changes to your system.

Acronis True Image Home 2012 is a powerful and complete way to protect your PC and to synchronize your files between all your PCs as well as you friends and family. **Try it today!**

Features & Benefits

- **New! File Synchronization**
Synchronizing your files between all your computers has never been easier. Acronis True Image Home 2012 supports the syncing of data between several PCs, quick recovery of synchronized data, syncing within local and network folders and access to data stored on Online Storage. It also supports File sharing and syncing files with friends and family with Acronis' socially-oriented file synchronization technology.
- **New! Enhanced NAS Support**
Acronis True Image Home 2012 now supports Acronis' award winning Nonstop Backup technology to a network share. A Network Attached Storage (NAS) device is also suggested as a backup place when attached to the network.
- **Enhanced! Ease of Use**
Acronis True Image Home 2012 allows you to delay the start of a backup at computer startup so that it doesn't impact your system. It also restarts the backup if any task fails.

And much more...

Core Features	Description
New! File Synchronization	Synchronize your files between folders, between multiple PCs, between friends and family and online storage over the internet with Acronis' socially-oriented file synchronization technology.
New! Acronis Extended Capacity Manager	Works with 2+ TB drives even if your operating system doesn't support them.
Full GPT and UEFI support	Keeps your PC up to date with industry standards
Improved! NAS Support	Nonstop backup to a shared network drive. Also recommends NAS storage as a backup location.
Improved! Acronis Nonstop Backup	Automatically creates incremental backups allowing users to roll back their system, files and folders to any point in time. Supports Acronis Secure Zone.
Drag and Drop Interface	Start tasks or backups without starting the whole application: just Drag and Drop the task to the desktop or Home. Start the process by double clicking on the icon.
Time Explorer	Add comments to any backup and take advantage of Time Explorer screenshots that show exactly what your desktop looked like at the moment of the backup.
Disk Imaging	Backup the entire system on the fly. It ensures the recovery of your operating system and applications without reinstalling any software.
Clone Disk	Copy your entire Hard Drive and replace it with a new one without reinstalling operating systems and applications, saving hours of effort.
Incremental and differential backups	Gives you alternatives to performing full backups every time. Both capture changes since the last backup and save disk space with Acronis data compression.
File Backup	Back up individual files, folders or file categories.
Acronis Startup Recovery Manager	Boot and restore a system after a failure. Start the recovery process simply by selecting the F11 key, even if your operating system has failed.
Try&Decide®	Safe environment for risk-free testing of new software or visiting websites with potentially dangerous content.
Virtual Hard Disk support	Convert Acronis' backup images (.tib) into virtual hard disk files (.vhd) and vice versa, allowing users to mount an image as a virtual disk and explore it. Windows 7 Ultimate users can also boot from .vhd images.
Acronis® Secure Zone®	Secure partition that allows you to store a disk backup file on your system drive. Recover on the fly, wherever you are, even if your operating system has failed.
Set&Forget™	Configure once and Acronis software performs backups automatically thereafter.
Image Encryption with Advanced Encryption Standard (AES)	Encryption algorithm used by US Government Agencies . Acronis True Image Home 2012 supports 128- and 192- and 256-bit encryption.
Acronis® True Image™ Online	Subscription service enables off-site information backup and recovery.
Acronis® True Image™ Home 2012 Plus Pack	Optional module that includes the flexibility to restore files, applications and an operating system to dissimilar hardware as well as providing support for Dynamic Disks and Microsoft® WindowsPreinstallation Environments (WinPE).

Supported Systems*

Storage Media
