Acronis

ACRONIS® BACKUP ADVANCED 11.7

Ideal for small to medium-sized businesses (SMBs), Acronis Backup Advanced 11.7 combines higher performance, quality and reliability with new features that make the buying and upgrade process seamless and easy, including a simple step up to the future Acronis Backup 12 solution.

Easy and Affordable Subscription Licensing

- Eliminate capital expenditures (CAPEX) and move to OPEX (operational expenses)
- Protect entire SMB datacenter with support of any physical and virtual system, and applications
- Select flexible 1-, 2- or 3-year option to suit the business needs
- Gain peace of mind with included technical support and upgrade protection

Greatly Improved Performance

- **(NEW)** Variable block size deduplication allows to store up to 24x times more data with the same amount of RAM
  - o Reduce costs of data protection and preserve your existing storage hardware investment
  - o Significantly reduced deduplication system requirements down to 128 Mb of RAM per 1 TB of unique data
- Back up more remote systems with **built-in Backup WAN Optimisation**, based on at-source deduplication
- Up to **40% faster recovery** from deduplicated storage
  - o Reduce RTOs and costs of downtime with faster recovery
- Save time with **x2.5 faster validation and compacting** of the deduplicated storage
- Faster **tape backup and recovery** with automatic block size detection and manual block size override

Expanded Storage Support

- Reduce risks and protect more shared network data with backup of files from NFS shared folders
- Achieve peace of mind storing more backups on **NFS-based Network Storage (NAS)**, in addition to SMB/CIFS/FTP/SFTP
- Expand off-site data protection with full support of LTO-7 tape drive technology

New Supported Platforms

- Protect entire infrastructure with even broader selection of supported OS and Hypervisors:

Windows

- **Windows 10 (x86/x64)**
- **Windows Server 2016 Technical Preview 4**

Linux

- Red Hat Enterprise Linux 7.x
- Ubuntu 14.04, 14.10, 15.04 and 15.10
- Fedora 21, 22 and 23
- SUSE Linux Enterprise Server 12
- Debian 7.6, 7.7, 8, 8.1 and 8.2
- CentOS 7 and 7.1
- Oracle Linux 7, 7.1 and 7.2 (including Unbreakable Enterprise Kernel)
- ClearOS 5.x, 6.x, 7.x
- Any other x86 / x64 Linux with kernel versions 3.14 - 3.18 as well as 4.0 - 4.4

Hypervisors

- **VMware vSphere (ESXi) 6.0**
- **Microsoft Windows 10 (x64) with Hyper-V**
- **Microsoft Windows Server 2016 Technical Preview 4 with Hyper-V**
- Microsoft Windows 8/8.1 (x64) with Hyper-V
- Citrix XenServer 6.5
- Oracle VM Server 3.3 for x86

Applications

- Microsoft Exchange 2016

Tape

- **Expanded Tape, Autoloader and Tape Library support, including LTO-7**
- Acronis Tape Hardware Compatibility List is available at https://go.acronis.com/acronis-backup-advanced-tape-hcl
