Acronis

ACRONIS® ACCESS

Designed exclusively for small and medium-sized businesses, Acronis Access is the industry's most affordable, best-in-class solution for secured mobile file access, sync, and share. Easy, complete, and safe, Acronis Access lets your employees work with the business content they need to be productive, no matter where they are, no matter what device they use.

BENEFITS OF ACRONIS ACCESS

- **Improve productivity -** Makes the remote, traveling, or telecommuting employee as effective as an in-office employee when out of the office or on the road.

- **Enhance customer service -** By improving their productivity, employees will be able to respond faster to customer inquiries and problems.

- **Grow revenue -** Improving service to customers separates you from your competition and helps to retain current customers, attract new customers, and grow your revenue.

- **Embrace BYOD -** Employees want the convenience of using their preferred devices for work. BYOD can be a strong differentiator in attracting new talent.

BEST ACCESS, SYNC, AND SHARE SOLUTION

Content, Anywhere, Anytime – Acronis Access lets authorized employees access, sync, and share content that resides on corporate file servers, SharePoint, NAS, and other data repositories using any device – iPhone or Android smart phone, tablet, laptop, PC or Mac.

Secure In-app Editing and Annotation - Users can create and edit Office documents and annotate pdf's within the Acronis Access mobile app, turning the mobile device into a true business platform.

Easy-to-use User Interface – An intuitive UI makes it simple and natural for users to use, requiring virtually no training.

Security and Control – Acronis Access's easy-to-use policies ensure control of content, users, and devices, including when you wipe content from employee devices.

Integration with Active Directory® - Acronis Access integrates with Active Directory® for authentication, user account management, and device enrollment.
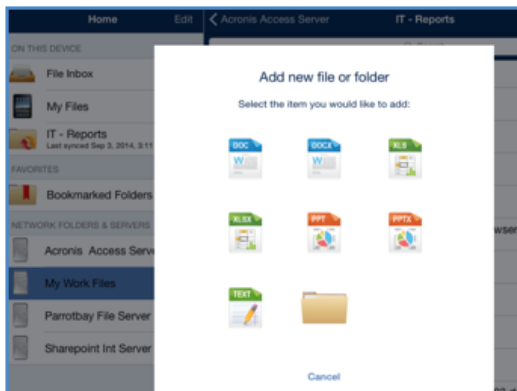

Tracking and Audit Trails – Audit trails always let you know what users are doing and who is accessing and sharing your content.

Encryption – Acronis Access provides secure over-the-air and on-device FIPS 140-2 certified encryption.
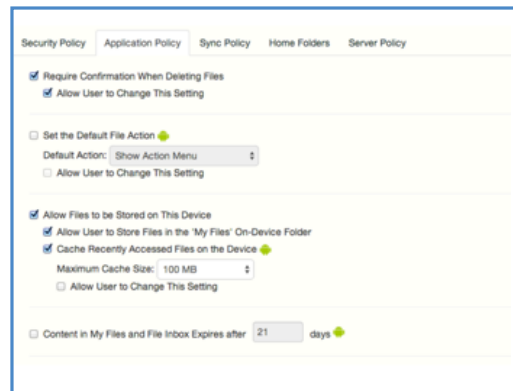

On-premise Deployment - Acronis Access is deployed on-premise providing the business with complete control over content and security.

Fast Installation - Acronis Access installs in a matter of minutes, delivering immediate time-to-value.

ACRONIS ACCESS CLIENT

ACRONIS ACCESS SERVER
