Acronis Access 7 FAQ

What is Acronis Access 7?

Acronis announced the launch of Acronis Access 7 with editions built specifically to address the needs of SMB and enterprise customers. These solutions allow users to control their mobile world by providing secure access to content and files on file servers, SharePoint, NAS and other repositories for mobile users, as well as by providing secure methods for users to share content with internal and external constituents across their PCs, Macs and mobile devices.

Users can drive competitive advantage by increasing their productivity, allowing employees to utilize mobile devices in work environments to drive faster, more informed decision-making, which ultimately leads to revenue, profitability and customer satisfaction. BYOD can now be more widely enabled with mobile users securely accessing their work files and documents from their own mobile devices.

1. *Acronis Access 7* – Designed exclusively for small and midsize businesses, Acronis Access is the industry's most affordable, best-in-class solution for secured mobile file access, sync, and share.

2. *Acronis Access Advanced 7* – Acronis Access Advanced is an easy, complete, and safe access, sync, and share solution for the enterprise, providing IT with complete control over business content to ensure security, maintain compliance, and enable BYOD.

Did you change the name of one of your products?

Yes, our existing enterprise product was previously *Acronis Access* and we are now changing the name to *Acronis Access Advanced*. This more accurately reflects the enterprise security, management, compliance and scalability features of this solution and the types of customers that use it. The solution is very popular in regulated markets such as financial services, healthcare, pharmaceuticals, government, energy and other markets.

Existing customers get a free upgrade to *Acronis Access Advanced* just as they do with any other new version. In addition, pricing has not changed.

With this name change, we will be introducing a new solution focused on small and medium-sized businesses, which will now be *Acronis Access.*

Acronis Access targets SMBs, and *Acronis Access Advanced* is best for larger companies (above 500 employees).
