

Acronis Disk Director Suite 10

Acronis Disk Director Suite 10.0 enables you to reorganize your PC for better performance and data protection.

Have you been putting off the task of repartitioning your hard disk drive because you did not want to go through the time consuming task of reinstalling your operating system, applications and recovering your data?

Did you know that separating your system data from you personal documents increases **PC** performance and data safety?

Did you want to recover an inadvertently deleted partition or edit your hard disk drive?

With Acronis Disk Director Suite you can do all of the above without impacting your current system! Acronis Disk Director Suite is a comprehensive disk management suite that combines a number of previous Acronis products into one solution:

- Acronis Partition Expert Resize, move, copy partitions without losing your data
- Acronis OS Selector Install and use more than one operating system on your PC
- Acronis Recovery Expert Recover accidentally lost or deleted partitions
- Acronis Disk Editor Perform advanced editing on your hard disk drive, such as restoring boot records and hexadecimal editing

Acronis Disk Director Suite 10.0 adds key new features making it easier than ever before to modify your existing partition structure and boot into new operating systems.

Moreover, Acronis Disk Director Suite 10 is an ideal companion product to Acronis True Image. Together the products provide you with comprehensive partition management and system protection. You can create two partitions on your system, one for data and one for applications, using Acronis Partition Expert. Then, you can backup your data partition on a regular schedule using Acronis True Image, ensuring that you capture changes to your data. You can also backup your system partition whenever you install new applications or apply new patches.

- New! Split partitions
- New! Merge partitions
- New! Explore partitions
- New! Boot from an additional hard disk drive
- New! Boot from CD/DVD
- New! Automatic operating system detection
- New! View logs
- Two usage options, wizard– driven or manual
- Modify, copy, move partitions
- Install multiple operating systems on one PC
- Recover lost or deleted partitions
- Edit a hard disk drive

Acronis Disk Director Suite 10

the selected folders into a new partition. The software automatica calculates how much space is required for the new partition and allows you to allocate the unused free space.New!
